Manager Hadley and Clerk Wilhite, of the Alvarado hotel, are enthusiastic students of physics now-a-days. They are interested in trying to solve the phenomena of why a boomerang will turn about and fly back in a direction opposite from that in which it is hurled. This afternoon they were experimenting with a number of boomerangs on a hotel piazza. The return theory worked out all right in several instances, but the boomerang showed a decided tendency to lodge themselves in trees and on the roof of the gallery.

LARGE TIMBER PUT TO CHASE IN WASHINGTON.

Tacoma, Wash., Jan. 10.—The Monarch Timber company has purchased 100,000 acres of timber land in this state for \$5,000,000. It is estimated by the management of the company that it will take at least fifteen years after the first log is cut to saw the last stick in this vast tract even if it puts several mills in operation and rushes the work with all possible speed. The panhandle of Idaho, particularly that portion lying between the St. Joe and St. Maries rivers, is almost one unbroken forest and it is in this country that the Monarch company has its holdings, the timber lying adjacent to these rivers. The erection of saw mills has been commenced and work on the timber will be commenced with all possible dispatch.
